PROFESSIONAL PROFILE

Junior Game Programmer with hands-on experience in Unreal Engine (C++ and Blueprints) and Unity (C#), gained through an internship and five game projects, including a multiplayer FPS. Passionate about shooters and 3D first- and third-person fighting games. Methodical and organized, I write clean, maintainable code and optimize development processes to ensure efficiency and quality. Used to collaborating with designers and artists in multidisciplinary teams and to meeting project deadlines.

WORK EXPERIENCE

• Web Developer (Internship)

Studio Evil (Bologna, Italy)

Jun 2026 - Aug 2026

- Studied Three.js and applied real-time 3D rendering to an interactive browser-based configurator
- Developed and optimized the configurator tool
- Built a business website presenting the configurator

• Unreal Game Programmer (Internship)

PowerUp (Bologna, Italy)

Jun 2025 - Sep 2025

- Built the Unreal Engine prototype of a game project submitted to Creative Europe
- Implemented and iterated on gameplay features and contributed to the game's design
- Produced the promotional trailer presenting the prototype
- Researched and applied new tools and development techniques

• Web Developer & Designer (Internship)

JORINF (Coimbra, Portugal)

Feb 2023

- Designed and developed the company website, covering both visual design and implementation
- Analyzed database management systems and data-handling practices
- Studied technologies used in financial data processing
